

DDA

detergente acido forte.

Line

DEEP CLEANING and SURFACE PREPARATION

Function

DESCALING ACID DETERGENT. Recommended for the removal of any calcareous encrustation (efflorescences, water marks, excess of cement, etc). Works well on rust

Materials

Natural stones, glass, ceramic tiles, gres porcelain tiles, concrete.
Contains anti-corrosion inhibitors for greater applicability.

How to use

Under normal conditions, use in a 10-20% dilution in water (1-2 liter of DDA in 10 liters of water). In severe cases may be used undiluted. Let the product work and rinse well by clear water. To neutralize residual acidity, add a small amount of NEUTREX to the rinse water. 2 to 3 additional rinses may be necessary to eliminate every trace of product, especially, when protective or impregnator product application is to follow DDA application

Packaging

LT. 1-5

Characteristics

Contains anionic surfactants biodegradable >90%, mineral and organic acids, binders, corrosion inhibitors. Active ingredients over 30%.

Important

Acid detergent: wear impermeable gloves and protective eye-wear.
For more information see product label or product Safety Data Sheet. A PRELIMINARY TEST IN A SMALL,

HIDDEN, AREA IS RECOMMENDED BEFORE THE APPLICATION.
USE ONLY ORIGINAL CONTAINERS;NEVER POUR THE PRODUCT INTO OTHER METAL OR GLASS
