

CRYSTAL MARBLE

cristallizzante per marmi.

Line

MAINTENANCE

Function

Specific product for crystallization of marble surfaces.To restore the original shine and gloss of the marble and terrazzo floors

Materials

Only for materials calcium carbonate based: marble, terrazzo, marble agglomerates etc

How to use

First, verify the absence of serious defaults. Uneven floors or/and full of gaps or deeply scratched must be grinded/polished again by using abrasives of grain 400.Operate only on dry floors. Spread on the floor small quantities of Crystal Marble and, using a single-brush equipped by a fine steel-wool disk, work with circular and even movement avoiding brusque direction changements of the machine or the movement by fits and starts.
Treat small surfaces of 4-5 square meters (40-50 square feet) each time. Work with the single-brush machine untill the product is completely absorbed and the floor is looking dry again. Avoid to use the steel-wool disks too much wet and replace them frequently (once dry the disks can be used again).The shine effect can be enhanced by a subsequent application of the special wax Monocera.

Packaging

LT.1-5-10

Characteristics

Aqueous emulsion of waxes and micro-crystal compounds. Active substance 10-15%.
