

EXTRA FLU

transparent polyester adhesive low viscosity and high penetration

Line

POLYESTER

Function

TRANSPARENT POLYESTER ADHESIVE, LOW VISCOSITY and HIGH PENETRATION, FOR MARBLE, STONE, GRANIT

Materials

MARBLE, STONE, GRANIT □

How to use

For best results mix 2% to 3% of the catalyst (dibenzoyl peroxide) with the adhesive; the paste formula make easy to measure. A homogeneous mixing will facilitate uniform catalysis. The catalysis rate is effected by temperature and by the proportion/quantity of catalyst. An excess of hardener/catalyst will increase the hardening speed, but weakens the adhesive seal. The surfaces to be treated/glued must be clean and dry; porosity and light roughness of the surface favor the best adhesion

Packaging

500ml-1L.

Characteristics

FOR MORE INFORMATIONS ASKING TECHNICAL DATA SHEET

Important

A PRELIMINARY TEST IN A SMALL, HIDDEN, AREA IS RECOMMENDED BEFORE THE APPLICATION.
