

## **KS 55 FLUIDA**

special dual-component highly transparent adhesive for affixing marble.granite,stone

#### Line

**POLYESTER** 

## **Function**

TRANSPARENT ADHESIVE/GLUE "GLASS EFFECT" transparency FOR AFFIXING MARBLE, STONE, GRANITE

## **Materials**

MARBLE.STONES, GRANITE

#### How to use

For the best result mix 2% to 3% of the catalyst with the adhesive. The paste formula makes easy to measure. A homogeneous mixing will facilitate the uniform catalysis. The catalysis rate is influenced by the temperature and by the proportion/quantity of catalyst. An excess of hardener/catalyst will increase the hardening speed, but weakens the adhesive seal. Surfaces to be treated/glued must be clean and dry; porosity and ligh roughness of the surface favour the best adhesion

# **Packaging**

L.1-4-19 Without catalyst Kg.225

### **Characteristics**

FOR MORE INFORMATIONS ASKING TECHNICAL DATA SHEET

## **Important**

A PRELIMINARY TEST IN A SMALL, HIDDEN, AREA IS RECOMMENDED BEFORE THE APPLICATION.

USE ONLY ORIGINAL CONTAINERS; NEVER POUR THE PRODUCT INTO OTHER METAL OR GLASS CONTAINERS
