

POLIEP

adesivo di qualita' superiore dato dal mix di epossidi e resine poliestere, ideale per superfici umidi e bagnate.

Line

POLIEPOXY

Function

SPECIAL ADHESIVE ALSO FOR HUMID OR WET MATERIALS

Materials

MARBLE, GRANITE,STONES, IRON, WOOD ALSO FOR HUMID OR WET MATERIALS

How to use

100 grams of POLIEP + 2 grams of paste hardener.For best results mix 2% to 3% of the catalyst (dibenzoyl peroxide) with the adhesive. The paste formula makes easy to measure. A homogeneous mixing will facilitate uniform catalysis. The catalysis rate is effected by temperature and by the proportion/quantity of catalyst. An excess of hardener/catalyst will increase the hardening speed, but weakens the adhesive seal.

Packaging

L.1

Characteristics

Available in standard colours: STRAW/BEIGE.Possibility of other colours upon request .
- higher total content of resins;
- longer working time (better wettability also on less porous supports: iron, etc.);
- longer self-life and stability;
- low odour and styrene controlled emission thanks to the presence of appropiated inhibitors;
- better polishing result thanks to the presence of suitable and studied mineral
