PRODUCT

COTTONET

**ALKALINE DETERGENT and DEGREASER
FOR TERRACOTTA**

Detergent for the cleaning of the terracotta suitable also for all kind of stone materials. Operates quickly and efficaciously on all dirt of organic and greasy nature. **Cottonet** is an efficacious product for the cleaning and maintenance of the **terracotta**. Cleans deeply without to remove the impregnating and protecting treatments. It is efficacious and delicate, without undesired effects, and can partially remove waxy layers. For the preparation of terracotta floors, during the rinsing phase, it is often used also as neutralizing agent after the acid washing.

FUNCTION

SOLVENT-BASED, DEGREASER, ALKALINE DETERGENT. Slightly foaming.

LINE

TERRACOTTA

CLEANING and DEGREASING

INDICATION

All kind of greasy dirt: **oils, grease, environmental dirt, smog, lamp-black, thin waxy layers.**

MATERIALS

Terracotta and all kind of materials except rubbers and synthetics.

HOW TO USE

For intense dirt and for deep cleaning it can be used pure as it is. For normal use, dilute from 5 to 15% (0.5-1.5 liters of Cottonet in 10 liters of water). Let the product work 10-15 minutes long avoiding the surface dries completely. Scrub vigorously the surface with cloth or brush or single-brush machine (equipped with a soft and non-abrasive disk). If needed, repeat the application.

Rinse with clear water. One or two rinsings more can be necessary if, after the floor is dry, a protecting/impregnating agent must be applied.

COMPOSITION

Contains anionic and non ionic surfactants biodegradable > 90%, mix of sequestering agents, glycolethers and polar solvents.

TEST

Before the application, it is suggested to effect a preliminary test on a small part of the surface to determine the consumption and the drying time and, after drying, the aesthetic result and the protecting level effectively performed.

CONSUMPTION

The consumption varies according to the kind of surface and the intensity of the dirt. A preliminary test to determine the appropriate dilution is recommended.

STABILITY

Stored in dry place, in closed original containers, at temperature of 15-25°C (59-77°F), the product is stable.

NOTE

Alkaline detergent. Wear impermeable gloves. Keep out from the reach of children. For more information about safety see the label or the Material Safety Data Sheet.

IMPORTANT

To obtain a deep cleaning, scrub the floor by using a brush with plastic bristles. The best results are obtained by using a single-brush machine equipped with a non-abrasive and soft disk. The presence of solvents can remove partially some kind of pre-existing treatment that should be applied again. In case of doubt it is always necessary to effect a preliminary test.

PACKAGING

1 L., 5 L., 10 L.

LIMITATION OF LIABILITY

The data provided derive from published information or from our own laboratory tests. The information provided here must be considered as a guideline and not as any form of performance guarantee. Since the application of the product is beyond the control of the manufacturer or supplier, our liability for defective products, when verified, is limited to refund of the purchase price.

A PRELIMINARY TEST IN A SMALL, HIDDEN, AREA IS RECOMMENDED BEFORE THE APPLICATION
