TECHNICAL DATA SHEET

PRODUCT

K 31

SCALE REMOVER ACID DETERGENT

This delicate acidic detergent is quite effective. It acts rapidly removing layers of **cement**, **saltpetre**, and **scale** from any type of stone surface. It is therefore suitable for all areas which are washed frequently; i.e. those places where incrustations and scale are most common such as **bathrooms**, **showers**, **toilets**, **wall and floor tiles**, etc. This multifunction detergent is particularly suitable for cleaning scale and is also effective on traces of rust. When appropriately diluted, it can also be used as a neutralizer after washing with basic detergents.

FUNCTION

SCALE REMOVER ACID DETERGENT

LINE

DEEP CLEANING and SURFACE PREPARATION

PROFESSIONAL and HOUSE

INDICATION

Scale removing detergent

MATERIALS

Particularly suitable for thorough cleaning of WALL and FLOOR TILES, BATHROOMS APPLIANCES, GLASS, STAINLESS STEEL, SYNTHETICS.

HOW TO USE

Under normal conditions the product can be used diluted to 5-20% in water (e.g. 5% = half liter of K31 in 10 liters of water). Under extreme conditions, it can even be used pure. After use, rinse the treated surface with clean water.

TEST

Always make a preliminary test on a small surface to determine the best dilution, action time required and effect achieved.

COMPOSITION

Contains anionic surfactants, mineral and organic acids, coadjuvants, corrosion inhibitors.

TECHNICAL DATA

Consumption depends on the intensity of the incrustations. In the most difficult cases, let the product work longer or repeat the application.

NOTES

Acidic detergent. Wear impermeable gloves. Keep out from the reach of children. Additional information can be obtained from the label or from the Material Safety Data Sheet.

IMPORTANT

To have the best cleaning results, rub the surface with a plastic brush.

Do not use on surfaces sensitive to the acids (on polished marble, anodized aluminium, etc. the acid products remove the gloss). When in doubt, make always a preliminary test.
