PRODUCT

COTTOFLASH

**SELF-POLISHING WAX
FOR TERRACOTTA AND POROUS MATERIALS**

Water based product easy to apply and long lasting. Of recent formulation, it is the result of several years of experience and of the appearance on the market of new polymers. This special formulation allows to obtain particularly high performances. The thin layer that is formed on the surface is perfectly adherent, flexible and resistant. **Cottoflash** adds high adhesion properties to a high self-polish grade. The treated floors are protected from foot-wear traffic and from the penetration of the dirt.

FUNCTION

Reviver of the natural colour, anti-stain sealer for terracotta

LINE

COTTO

SURFACE TREATMENT

INDICATION

Waxy and film-maker water based protecting agents suitable for interior.
Makes on the floor a protecting layer easy to polish.

MATERIALS

Terracotta floors, **natural stones** and **marbles** not lead-polished, porous materials in general.

HOW TO USE

Very porous materials need an impregnating pre-treatment by **Cottoforte** or **Cottoforte Natura**. On the clean and carefully rinsed surface, apply the product pure as it is; spread it homogeneously and evenly by a wax-spreader or a clean cotton cloth. Do not walk on the floor until the complete drying of the surface.
If a higher shine grade is requested apply a second coat (at least one hour after the complete drying of the first coat) or polish the treated surface manually or with a floor-polisher.

TEST

Before the application, it is suggested to effect a preliminary test on a small part of the surface to determine the compatibility of the product with the material to be treated, the consumption and the drying time and, after drying, the aesthetic result and the protecting level effectively performed.

COMPOSITION

Aqueous emulsion containing natural and synthetic polymeric waxes. Active substance >20%.

TECHNICAL DATA

The consumptions vary according to porosity of the treated material; normally are considered to be between 70 and 150 gr/m².

STABILITY

The product is an aqueous emulsion. Do not store at temperature lower than 0°C (32°F) and higher than 40°C (104°F); this condition respected and stored in the original well closed containers, the product is stable at least 1 (one) year.

NOTE

Water based product; it can be applied even on damp or slightly wet surfaces.
After drying, it is possible to apply a second coat according to the shine grade required.

IMPORTANT

The product is UV stable and resistant to the atmospheric agents and in certain cases it can be applied at the exterior. If needed, the product can be removed by the specific wax-remover **Dekercotto**.
Cottoforte, **Cottoforte Natura** and **Dekercotto** are products of GENERAL[®] protection line.

LIMITATION OF LIABILITY

The data provided derive from published information or from our own laboratory tests. The information provided here must be considered as a guideline and not as any form of performance guarantee. Since the application of the product is beyond the control of the manufacturer or supplier, our liability for defective products, when verified, is limited to refund of the purchase price.

A PRELIMINARY TEST IN A SMALL, HIDDEN, AREA IS RECOMMENDED BEFORE THE APPLICATION
