TECHNICAL DATA SHEET PRODUCT <hr/> CRYSTAL MARBLE
--

CRYSTALLIZER FOR MARBLE AND TERRAZZO

Water based emulsion of micro-crystal compounds and waxes ideal to restore the looking-glass shine of the floors of **marble, terrazzo, marble agglomerates** which lost the original glossiness and shine. The proceeding, even if not so long lasting as the traditional polishing system, is innovator and more ecological, practical, quick and economic.

The obtained glossiness is long lasting and the maintenance interventions on the treated surfaces with the crystallization proceeding are quicker and easier.

FUNCTION

Specific product for crystallization of marble surfaces.

LINE

PROFESSIONAL

MAINTENANCE

INDICATION

To restore the original shine and gloss of the **marble** and **terrazzo** floors.

MATERIALS

Only for materials calcium carbonate based: **marble, terrazzo, marble agglomerates**, etc.

HOW TO USE

First, verify the absence of serious defaults. Uneven floors or/and full of gaps or deeply scratched must be grinded/polished again by using abrasives of grain 400 or 600.

Work only on dry floors. Spread on the floor small quantities of Crystal Marble and, using a single-brush equipped by a polishing pad for crystallization (like 3M pad silver colour or/and bronze colour); work by even rotating motion avoiding abrupt/sudden changes of direction of the machine or the movement in jerks.

Treat small surfaces of 3-4 square meters (30-40 square feet) each time. Work with the single-brush machine until the product is completely absorbed and the floor is looking dry again. Avoid to use the polishing pads too much wet and replace them frequently (once dry they can be used again).

The shine effect can be enhanced by a subsequent application of the special wax **Monocera**.

TEST

Before the operations, make a test on a small surface (1-2 sq. meters) and verify the result 24 hours later. The treated area must be more shining and homogeneous in comparison with the not treated floor.

COMPOSITION

Aqueous emulsion of waxes and micro-crystal compounds.

Colours: WHITE or/and TRANSPARENT

TECHNICAL DATA

Consumptions vary according to the kind and condition of the floor and the shine grade requested.

STABILITY

The product is an aqueous emulsion: *CANNOT STAND THE FROST*. Do not store the product at temperature lower than 5°C (41°F) and higher than 35°C (95°F); store in dry place and keep well closed the containers. These conditions respected the product is stable.

NOTE

After the floor is dry a subsequent application of **Monocera**, polished with a common polishing machine equipped with a soft felt, enhances the brilliance of the crystallization.
The floors treated with Crystal Marble don't need particular maintenance and the usual cleaning operation is more easy and quick.

IMPORTANT

The product is environment friendly and leaves an agreeable floral fragrance and it is widely used in private and public places such as hotels, restaurants and communities.

PACKAGING

1 L., 5 L., 10 L.

LIMITATION OF LIABILITY

The data provided derive from published information or from our own laboratory tests. The information provided here must be considered as a guideline and not as any form of performance guarantee. Since the application of the product is beyond the control of the manufacturer or supplier, our liability for defective products, when verified, is limited to refund of the purchase price.

A PRELIMINARY TEST IN A SMALL, HIDDEN, AREA IS RECOMMENDED BEFORE THE APPLICATION
